UK

## Declaration of Conformance

We declare, that:

The following products conform to International standards and specifications for fibre optic connectivity products. Performance is verified by type testing.

### Standard

ISO/IEC 11801, GR326, IEC61300-3-4, IEC61300-3-6,  
IEC61754

### Products

SC product family  
FC product family  
ST product family  
LC product family  
E2000 product family  
MTP product family

And the E2000 product supplied by FibreFab is licensed from H&S. The MTP product supplied by FibreFab is licensed from US Conec.

## **RoHS Certificate of Compliance**

EU Directive 2002/95/EC is the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment.

New electrical and electronic equipment placed on the EU market must not contain more than allowed levels of lead, cadmium, mercury, hexavalent chromium, polybrominated biphenyl (PBB) and polybrominated diphenyl ether (PBDE) flame retardants. The maximum concentrations are 0.01% for cadmium and 0.1% for the other substances, by weight per homogenous material.

In order to help our customers meet the requirements of this legislation, FibreFab confirms that all our products are RoHS compliant, unless specifically stated otherwise. We will endeavour to clearly label all compliant products as such.

We stock items that are exempt or outside the scope of the directive and we will not label these items as compliant. For example, lead is present in some Test and Measurement equipment, however, these fall within Category 9 - Monitoring and Control Instruments, which is currently outside the scope of the Directive.

Dr. Alan Keizer  
Director of Engineering
