

Who we are

FibreFab

FibreFab is a respected and successful manufacturer of advanced, reliable passive and active networking products. The company's reputation has been built on superior levels of technical product innovation, support and service.

FibreFab designs, develops and manufactures products for use in local or wide area networking and telecommunications installations. The company's fibre optic and copper-based connectivity, cabling, component and equipment solutions are sold in most countries. FibreFab has the engineering, production and logistics facilities to serve its customers, from the highly specialized distributor serving data installers to major corporations, structured cabling companies and multinational OEM's. These customers are served from manufacturing facilities and logistics centres worldwide.

An ISO9001 approved company; FibreFab is able to provide its customers with the technical expertise, manufacturing flexibility and supply chain management to be able to develop a comprehensive and high quality range of products for the installed network.

OPTRONICS

In 1994 FibreFab acquired Optronics, a company with over 20 years previous experience in the fibre optic manufacturing industry. The Optronics range includes patchcords, pigtails (multimode and singlemode), patch panels, wall and splice boxes (unloaded or customised) and a full range of accessories.

Optronics products are available directly from FibreFab or from our distributors all over the world.

FibreFab's range and capabilities are constantly being expanded.

FibreFab can also supply OEM products, specifically designed to your own Specification.
